nopa instruments Medizintechnik GmbH

The head office of **nopa instruments** is located in Tuttlingen/Germany.

1982

The company is founded. The international company name comes from the initials **N**orbert **P**auli = **nopa** instruments.

1988

Constant and consistent success requires the company to move into a much larger business space.

1989

The company's continual growth requires repeated expansion of the operations building in Gänsäcker 9.

1990

The product portfolio expands to include a new key segment: **nopa** instruments now also supplies endoscopic products.

1991

nopa instruments expands. An urgently needed expansion of the production plants is planned and quickly implemented.

1995

nopa instruments is one of the first medical technology companies to become DIN ISO 9001 and EN 46001 certified.

1998

The construction of a spacious warehouse building is set in motion to guarantee extensive delivery capability.

2002

In 2001, a spacious and architecturally striking administration building is planned next to **nopa** instruments Technik, completed and occupied by the company in June 2002.

2003

At the start of the year, nopa instruments makes a catalogue system available on CD-Rom and online.

>> future
be part of it

2017

nopa instruments celebrates the company's 35th anniversary. A new warehouse and production hall is built.

2020

Building a new 700 m² space for larger projects and modernizing existing buildings to meet the latest energy standards.

2022

One of the first companies in Tuttlingen to have met the requirements of the new European Medical Device Regulations (MDR).

WILLIAM STEWART HALSTED

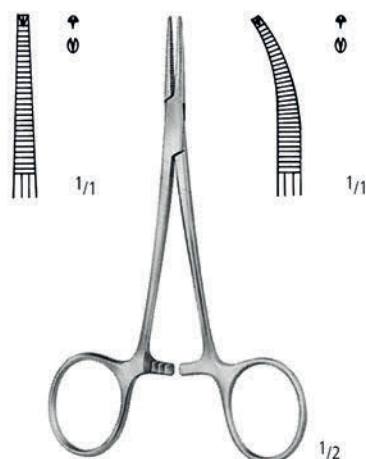

was professor of surgery in the Johns Hopkins University.
In 1890 he had bronze casts made of his own hands. On these casts the first surgical rubber gloves were moulded.

- >> Alle unsere Mikroscheren werden von Fachkräften mit jahrelanger Erfahrung hergestellt. Die Endkontrolle findet unter dem Mikroskop statt. Um Ihnen ein ermüdungsfreies Arbeiten zu ermöglichen, wird dem Federdruck größte Aufmerksamkeit gewidmet.
- >> Bitte wählen Sie unter Rund- oder Flachgriffscheren.

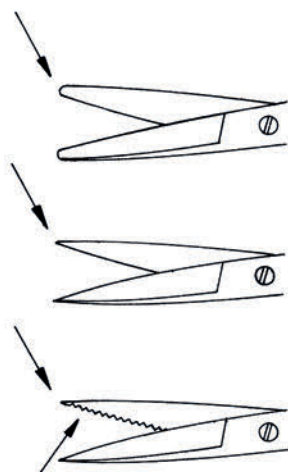

Dissection: Gebogene Blätter, abgerundete Spitzen ermöglichen eine gute und sichere Dissektion, ohne Nerven und Blutgefäße zu beschädigen.

Adventitia: Gerade Blätter, sehr scharfe Spitzen gewährleisten präzises Anfrischen von Gefäßenden.

Nerve: Ein Blatt ist fein gezahnt, um ein Herausgleiten des Nervs zu vermeiden.

- >> All our Micro Scissors are manufactured by skilled craftsmen with many years of experience. Final inspection is carried out under a microscope. Careful attention is paid to the closing pressure of the spring handle, to ensure precise work during surgeries, without fatigue.
- >> Round or flat handle scissors according to your preference.

Dissection: Curved blades, slightly rounded tips ensure safe dissection without damage to nerves and vessels.

Adventitia: Straight blades, very sharp tips for finest trimming of vessel ends.

Nerve: One blade is fine-toothed to avoid slipping of the nerve.
